

Scientific Experts Reveal The Truth About GMO's

A film, presentation and discussion

Tuesday, October 2nd, 2012
7pm - 9pm

California Right to Know Campaign invites you to experience a controversial and provocative movie --"**Scientists Under Attack**"-- followed by discussion with Dr. Michelle Perro. The film reveals how the biotech industry has repeatedly blocked the original research conducted by world class scientists by using gag orders, personal smear campaigns and even destruction of data.

After the film, Dr. Michelle Perro will lead a Q and A session and discuss the relationship between the introduction of Genetically Engineered foods into the American diet and the emerging epidemic of digestive, immunologic, and neurologic changes in children's health. Info on what you can do to support YES on Prop 37 and get GE foods labeled will be provided.

Dr. Michelle Perro, is a physician at Integrative Medicine's Institute for Health and Healing in San Francisco. She has a 27 year career in pediatrics and sits on the board of a California environmental group working to reduce chemical toxicity in children and families.
