UK Starmer, Get Your Bloody Hands Off Tony Greenstein and Other Opponents of The Zionist Genocide

Stop Prosecuting Anti-Zionist Tony Greenstein & Other Palestine Activists in The UK, Germany, Argentina and France
Jail The Politicians Who Vote For War Crimes, Weapons Suppliers and Funders of The Gaza Genocide & War Crimes In Israel

Global Day of Action
Friday, January 31, 2025
12:00 Noon
At: British Consulate
1 Sansome St., at Market, SF

On January 31, 2025, the British government led by Labor party leader Keir Starmer and its court will be putting anti-Zionist activist Tony Greenstein on trial under the Terrorism Act for supporting a proscribed organization. Greenstein is a co-founder of the Palestine Solidarity Campaign. He is also an author of many articles about the role of Zionism including the AFL-CIO supported Israeli Histadrut, the so called union federation which supports the apartheid regime with funding of the IDF for it's crimes.

This attack on Greenstein is a major attack on democratic rights, and other Palestine activists have also been charged with crimes for opposing the genocide by Israel backed by the UK and military contractors. He could face 14 years in jail under a law that is aimed at critics of the apartheid state of Israel. The racist and Zionist state and their supporters around the world are working to make it a crime to criticize Israel and genocide and equate anti-Zionism with antisemitism.

This is not only a threat in the UK, but France, Germany, France and Argentina where anti-Zionists and trade unionists have been attacked and arrested by the po-

lice for peaceful protests against the US UK supported genocide. While these anti-Zionists in the UK are being prosecuted, the targeting of journalists and the murder of over 140 in Gaza has been met with complicity with the UK and US government.

It is an imminent danger in the US as well with the installation of a Trump fascist government. They have threatened mass arrests and deportations of supporters of Palestine on campuses and in the streets. They are also introducing legislation to making it illegal to criticize Zionist Israel and its genocidal policies which are supported by both the UK and the US governments.

These governments, politicians and billionaire class are the real supporters and funders of terrorism and genocide in Gaza and around the world. We must stand now in defense of Greenstein and others who are facing criminal charges globally & must unite the US working class and unions to defend democratic rights. Stop this gnocide now!
